

## **BLUESTONE BLUEGUM**

Enhanced Tumbled 600 x 100/150/250 x 30mm Pavers

Bluestone is a broad term that is applied to several stone types which are dark and/or blue in colouring. This one is a steely natural blue, with an interesting mix of mottled and linear white veining. The tumbled edges create a worn, slightly rounded finish, amplifying the character of this paver.
