

## **TRAVERTINE SILVER PEARL**

Split Face Random Lengths, 100mm (H) Veneers, nominal 20-25mm

**all sizes available:** Random Lengths 100mm (H) Veneers

This visually appealing travertine; has sparkly quartzite deposits throughout the fossilised travertine structure. It effectively blends neutral warm sandy tones with light-mid greys for distinct appeal. The linear format adds contemporary lines that are balanced by the slightly craggy texture. Suitable for internal or external feature walls, fireplaces, blade walls and most other applications.
