

BASALT DAWN GREY

Sawn Face Crazy Paving, nominal 20mm

This volcanic rock features pores created by rising gas bubbles. The grey colouring works well in a contemporary design, especially in contrast with plant life or rust features.

We recommend using a wet lay install for this stone and selecting a pointing colour to contrast with and highlight the random shapes of this stone. Crazy paving can also be effectively worked into curves, making this option ideal for creating stand-out organic shapes in your outdoor space.
