

BLUESTONE BLUEGUM

Enhanced Tumbled 200 x 50 x 25mm Cobblestones

We encourage you to have fun with the lay pattern of this stone, to formally define and dress up paths, driveways, or patio spaces. It can be laid in brick bond, stack bond, herringbone, fishtail and with borders. The natural blue works perfectly with a heritage slate veranda or threshold, but it is equally effective worked into a contemporary design.
