

QUARTZITE COTTAGE BLEND

Four Sides Cut Split Face Veneers, nominal 25-35mm

With so many colours present in this stone conveying warmth with its sandy, ochre and coffee tones it can really play with surrounding colours in a space to highlight specific features, especially timber. Alternatively, it lends itself well to create a feature in an otherwise light colour scheme.

This option while still irregular in size, has had all four sides cut by the quarry giving the stone a squarer appearance.
